Babcock

Dear Mr. Babcock:

Acknowledging your notice of 11-13-79, and following up on our phone call of 11-20-79, we have since reviewed our installations.

We did find a floor grating in bad repair over a sluiceway, and some needed housecleaning. Both could and we suspect would be a source of zinc oxide that would show up in our lab reports as zinc and suspended solids.

Both are being corrected. ✓

Thank you for calling this to our attention. We will follow up on corrective steps, and trust this will resolve the problem.

Very truly yours,

Jay E. Fowler
Vice-President
